Should Fix:

## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

Approximately 8% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <https://wchat.freshchat.com/js/widget.js>

### [Optimize CSS Delivery](#) of the following:

- <https://fonts.googleapis.com/css?family=Open+Sans:400,600>
- <http://13.127.29.169/styles.7b74960ac8c49d8e6f17.css>

### Consider Fixing:

#### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://13.127.29.169/assets/img/demo/fc/Auctions.jpg> (expiration not specified)
- <http://13.127.29.169/assets/img/demo/fc/Contracts.jpg> (expiration not specified)

## 81 / 100 User Experience

### Should Fix:

#### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a class="nav-link">Strategic Sourcing</a>` and 17 others are close to other tap targets.
- The tap target `<a class="nav-link">Internal and e...essaging tools</a>` and 1 others are close to other tap targets.

# Mobile

## Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 437 CSS pixels wide, but the viewport is only 412 CSS pixels wide.

## 3 Passed Rules

### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

### Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
