Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <https://packers-and-movers-bangalore.in/css/style.css>
- <https://fonts.googleapis.com/css?family=Exo+2>
- <https://packers-and-movers-bangalore.in/css/style-custom.css>
- <https://fonts.googleapis.com/css?family=Exo+2>

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://www.google-analytics.com/analytics.js> (2 hours)

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 44.6KiB (58% reduction).

93 / 100 User Experience

 Consider Fixing:

Size content to viewport

Mobile

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 414 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element `<div class="bottom-topad-span1">Vijay Packers...068, Karnataka</div>` falls outside the viewport.
- The element `<div class="bottom-topad-span2">DHL Logistics...tor, Bangalore</div>` falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `` is close to 3 other tap targets final.
- The tap target `` is close to 1 other tap targets final.
- The tap target `About Us` and 4 others are close to other tap targets final.
- The tap target `<input type="text" name="movefrom">` is close to 1 other tap targets final.
- The tap target `Packers and Movers Bangalore` and 29 others are close to other tap targets.
- The tap target `Packers Movers...galore Google+` and 1 others are close to other tap targets.
- The tap target `` is close to 1 other tap targets.
