Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 12 blocking script resources and 14 blocking CSS resources. This causes a delay in rendering your page.

Approximately 2% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 12 blocking script resources and 14 blocking CSS resources. This causes a delay in rendering your page.

Approximately 1% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
