48 / 100 Speed

! Should Fix:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 329KiB (77% reduction).

- Compressing <http://sitevaluecheck.net/css/bootstrap.min.css> could save 100.3KiB (83% reduction).
- Compressing <http://sitevaluecheck.net/css/themes/amelia.css> could save 83KiB (83% reduction).
- Compressing <http://sitevaluecheck.net/js/jquery.min.js> could save 53.5KiB (64% reduction).
- Compressing <http://sitevaluecheck.net/js/q.js> could save 45.9KiB (74% reduction).
- Compressing <http://sitevaluecheck.net/js/bootstrap.min.js> could save 26.4KiB (73% reduction).

Mobile

- Compressing <http://sitevaluecheck.net/> could save 10.4KiB (80% reduction).
- Compressing <http://sitevaluecheck.net/js/app.js> could save 4.9KiB (75% reduction).
- Compressing <http://sitevaluecheck.net/js/circle.js> could save 3.3KiB (65% reduction).
- Compressing <http://sitevaluecheck.net/css/base.css> could save 1,000B (61% reduction).
- Compressing <http://sitevaluecheck.net/css/mystyle.css> could save 213B (43% reduction).

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://sitevaluecheck.net/css/base.css> (expiration not specified)
- <http://sitevaluecheck.net/css/bootstrap.min.css> (expiration not specified)
- <http://sitevaluecheck.net/css/mystyle.css> (expiration not specified)
- <http://sitevaluecheck.net/css/themes/amelia.css> (expiration not specified)

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 5 blocking CSS resources. This causes a delay in rendering your page.

Approximately 63% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <http://sitevaluecheck.net/css/bootstrap.min.css>
- <http://sitevaluecheck.net/css/base.css>
- <http://sitevaluecheck.net/css/themes/amelia.css>
- <http://fonts.googleapis.com/css?family=Lobster|Cabin:400,700>
- <http://sitevaluecheck.net/css/mystyle.css>

Consider Fixing:

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

Mobile

[Minify CSS](#) for the following resources to reduce their size by 737B (35% reduction).

- Minifying <http://sitevaluecheck.net/css/mystyle.css> could save 496B (100% reduction).
- Minifying <http://sitevaluecheck.net/css/base.css> could save 241B (15% reduction).

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 4.7KiB (37% reduction).

- Minifying <http://sitevaluecheck.net/> could save 4.7KiB (37% reduction).

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 39.2KiB (57% reduction).

- Minifying <http://sitevaluecheck.net/js/q.js> could save 36.4KiB (59% reduction).
- Minifying <http://sitevaluecheck.net/js/app.js> could save 2.8KiB (43% reduction).

Avoid landing page redirects

Mobile

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

Optimize images

Your images are optimized. Learn more about [optimizing images](#).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

99 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<div id="abgc" class="abgc">AdChoices</div>` is close to 1 other tap targets final.
- The tap target `3` and 4 others are close to other tap targets.
- The tap target `<div id="abgc" class="abgc">AdChoices</div>` is close to 1 other tap targets.
